

● CAD COURSE

CAD-206 UG/PG PROJECTS

OBJECTIVE: To successfully complete final year projects and additionally gain industrial CAD knowledge.

DURATION - 50 DAYS

- We provide a wide list of mechanical design engineering projects with innovative techniques for real life and after market problems for research and development.
- Our research teams constantly work on identifying various new technologies (composite design, additive manufacturing etc.) related to CAD design.
- Hands on training will be provided
- Smart class training and project demonstration
- Theoretical review notes, design calculations, project report & presentations.
